**92. [---] MOSES, ROBERT. Proposed Lower Manhattan Crosstown Expressway.** New York: The Author, 1946. This is an elaborate letter to Mayor O'Dwyer from Moses ("City Construction Coordinator") and Borough President Hugo Rogers explaining why this "crosstown artery free from street crossings" has to be built. With an element of circular logic, as one need cited is the increased traffic resulting from other proposed Moses projects and extensions of existing roads. With the usual parking solutions and new small parks and playgrounds on the Lower East Side. He predicts that "...land shall be acquired and construction [i.e. destruction] started in 1948, and...completed in 1949." He then instructs the Mayor to get busy promoting the Expressway, "...the first of what will ultimately be a series of east and west crossings in Manhattan to serve as connections with the new marginal north and south drives and parkways and underriver tunnels." The letter is followed with results of studies, engineering details, idealized drawings of the six-lane elevated highway running up a widened tree-lined Broome Street "...[will be] the widest public street in the Borough..." and folding maps and photographs. Caro calls the unexpected release of this document a pressure tactic to get the Mayor moving on financing the more spectacular Mid-Manhattan Expressway. (*The Power Broker* p.769) \$200.00
